

Health and Safety – Grit supply and deliver fully stocked grit bins.

It is that time of year again where winter is fast approaching and as you are probably aware UK demand for de-icing salt over the last three years has been massive. This has meant that the suppliers have frequently either run out or the Government has issued edicts stating that the suppliers can only supply local authorities. We therefore took the decision to arrange for more warehouse space and have therefore stockpiled salt for this winter. This means that we have a large supply of salt that we will priorities to our clients and sites that commit to gritting or salt provision now.

Please can you urgently confirm if you wish us to supply and deliver fully stocked grit bins for site. We would appreciate an urgent answer as I have attached a link from the recent press that has all reported that this winter (2011-12) will as bad as the last two winters and possibly worse and we obviously have to plan.
